# November 2025 Product Release

AppViewX is proud to announce the latest November 2025 product release that includes new features and enhancements to the AVX ONE platform.

## Short-Lived Certificate Management

Automate compliance, eliminate risk to meet the 47-day mandate

Feature	Description	Benefit
<b>Automated Onboarding and Discovery</b>	Instantly detect and onboard endpoints (servers, network devices, IoT, etc.) for streamlined certificate provisioning.	Fewer outages, security breaches, and compliance gaps.
<b>Automation of Domain Control Validation (DCV)</b>	Meet 47-day compliance by validating domains and issuing renewals automatically—no manual effort required.	Continuous compliance with CA/Browser Forum mandates.
<b>Certificate Lifecycle &amp; Validity Enhancement</b>	Define new certificate validity for renewals, generate new private keys, and use templated re-enrollment policies for consistent compliance.	Reduced operational overhead through automation and visibility.

# Quantum Trust Hub

Prepare for the post-quantum cryptography era

Feature	Description	Benefit
<b>Enterprise Assessment &amp; Remediation</b>	Get a comprehensive assessment of certificates, algorithms, protocols, libraries, and keys—complete with a Cryptographic Bill of Materials (CBOM) and remediation recommendations.	Understand your crypto-readiness instantly with clear vulnerability counts and remediation guidance.
<b>Comprehensive Reporting</b>	Generate a full-featured report that assesses your crypto-agility across source code, apps, certificates, databases, and more.	Adapt to new standards published by NIST, NCSC, and other regulatory agencies.
<b>Dashboard Insights</b>	Consolidate data and insights into one view, enabling leadership to make informed, strategic decisions on crypto posture across the organization.	Demonstrate security leadership and meet compliance requirements.

# AppViewX InfinityAI

Improve user experience with AI-enabled search and navigation

Feature	Description	Benefit
<b>AI-Enabled Navigation</b>	Allows users to navigate by simply stating what they need to do, for example, "rotate a certificate" or "add a new device group."	Context-aware guidance reduces onboarding, learning curves, and improves user experience.
<b>Natural Language Search and Reporting</b>	Quickly search or build custom reports by using AI-enabled prompts.	Any user can now self-serve insights without relying on internal support teams, increasing overall efficiency.
<b>Intelligent Knowledge Base</b>	Find answers to product-related questions using a simple, conversational interface.	A common AI interface that extends across the AVX ONE SaaS platform.

# Policy Engine

Faster time to value, no complexity

Feature	Description	Benefit
<b>Pre-Defined Policy Templates</b>	Leverage templates for common use cases to onboard faster while retaining the option to use visual workflows for more complex custom use cases.	Faster time to value through simplified, self-service deployment.
<b>Automated Device Onboarding</b>	Detect and onboard devices automatically, enabling faster discovery and provisioning of certificates.	Streamlined certificate re-enrollment minimizes friction during renewal processes.
<b>Admin Configurable Template Options</b>	Define enrollment behavior and UI for delegated access to meet increased certificate needs across teams.	Flexibility to tailor policies for unique enterprise environments.

City Hall, 222 Broadway
